## things you should know about

Better primary health care through team-based initiation of advance care planning and palliative care

# 1

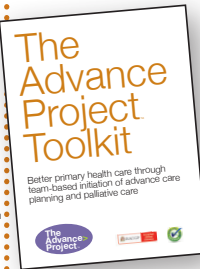

The Advance Project™ is all about enabling **better health care**, particularly in the areas of **advance care planning** and **palliative care**.

# 2

Our goal is to support **GPs, nurses and managers** to promote a team-based approach to initiating advance care planning and palliative care **in everyday general practice**.

# 3

There's a **new and updated toolkit** resulting from comprehensive evaluation and consultation, **designed specifically for GPs, nurses and practice managers**.

# 4

**It's free!**

There is **FREE online training** and **individual tele-mentoring** available with an experienced palliative care nurse. And the training counts towards your profession's CPD requirements.

*"I've just done the training - it's user-friendly, comprehensive, and very compassionate. In my opinion it's really filling a gap."*

ADVANCE PROJECT PARTICIPANT

# 5

The Advance Project™ is **funded by the Australian Government** with training endorsed or accredited by the relevant professional associations.
